

Wide Scanning

Getting a Broader Perspective

Plan of action

Wide scanning involves the ability to gather information from a depth of sources. For example it wasn't many years ago that Doctors tut-tutted patients who attended chiropractors and acupuncturists etc. However doctors realised that they don't have all the answers. Humans are a creature of habit. It's very comfortable to rely on information from the same old sources but it's critical to expand your horizon of learning.

Key Learning Outcomes

At the conclusion of this program participants will possess the skills to:

- Question the validity of assumptions
- Avoid myopic perspectives
- Calibrate your levels of conditioning based problem solving
- Analyse cause and effect case studies
- Expand your platform of learning
- Use design thinking to explore opportunities
- Think with the end in mind
- Review habitual solutions
- Put yourself in other people's shoes
- Think holistically

Would you like to attend this program?
