

AGILE PROJECT MANAGEMENT

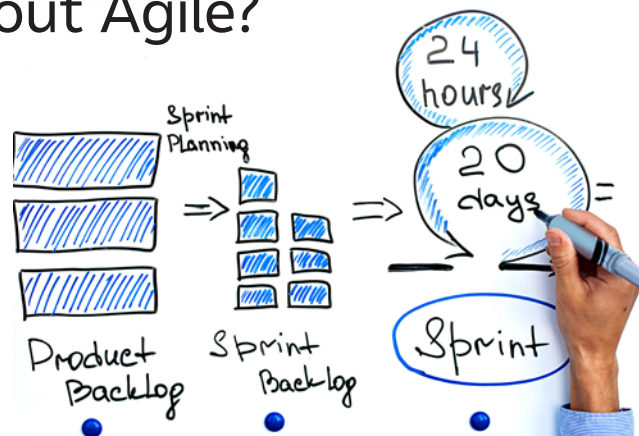

FOR TEAM LEADERS AND SUPERVISORS

What do your team leaders and supervisors really need to know about Agile?

This is an abridged Agile Project Management course. Your team leaders and supervisors will gain a very good working knowledge of the AGILE approach.

This one-day workshop will give your participants a rapid understanding of the values, benefits, and practices of Agile and Scrum and how this applies to your job. Traditional project management approaches can be slow and too time-consuming. The AGILE approach is a series of iterative accomplishments. AGILE Project Management offers a methodology that covers the people, products and techniques required to develop projects and keep stakeholders involved.

“gain a rapid understanding of the values, benefits, and practices of Agile and Scrum and how this applies to your job”

KEY LEARNING CONTENT

- Learn the agile process
- Discover the tools and processes of Agile
- Unpack Agile terminology — eg what is Scrum?
- Responding to unpredictability
