STRATEGIC THINKING

"Strategy without tactics is the slowest route to victory." - Sun Tzu

This course provides an overview of strategic thinking and its application to problem-solving. Participants will learn how to create a holistic strategy to identify priorities, recognize patterns, and evaluate outcomes. These skills can be applied to any situation in order to generate valuable solutions. Through practical examples, discussions, and activities, participants will gain a better understanding of why successful strategies require various levels of analysis, organization, and creativity. Join us and develop your skills in strategic thinking.

Key Course Content:

- Think ahead and think big picture
- Become more proactive
- Understand the lifecycle of planning
- Focus on outputs/results
- Undertake long term planning and contingency planning
- Use experience to guide future action
- Identify characteristics of profitable and successful organisations
- Determine "best practice" that can be incorporated into daily operations
- Implement risk management strategies throughout your organisation

Target Audience:
The course can be tailored for the specific cohort whether it be the leadership team, another group of managers/team leaders or employees.

Duration:
This course is available as a 1-day course or a truncated half-day course.

Delivery:
This course can be delivered both in-person or virtually. For virtual delivery, we can use our virtual platforms or your organisations.

Group Size:
We recommend a group size of 4-10 people.
